CONTENTS

Abdul Sami AWAN and Mihai VOICU Aurelian CERNEA	Pseudo-resolvents  A note on viable solutions for a non- autonomous differential inclusion without convexity
Lavinia Corina CIUNGU Neculae DINUȚĂ	States on pseudo-BCK algebras Pseudo-horizontally homothetic maps on semi-Riemannian manifolds
Petre Sorin ILIAȘ Alina NICOLAIE	Dirichlet problem with $p(x)$ -laplacian A sufficient condition for the convergence of a finite Markov chain
Udrea PĂUN Vasile PREDA and Miruna BELDIMAN	$\Delta$ -ergodic theory and reliability theory A projection method for systems of generalized variational inequalities with $\mu$ -Lipschitz continuous mappings
