

MATHEMATICAL REPORTS
VOL. 11(61)· No. 4· 2009

CONTENTS

Vladimir RĂSVAN	Constantin VÂRSAN on his 70 th birthday
Silvia BALEA, Andrei HALANAY and Ioan URSU	Stabilization through coordinates transformation for switched systems associated to electrohydraulic servomechanisms
J. F. BONNANS and D. TIBA	Control problems with mixed constraints and application to an optimal investment problem
Vasile DRĂGAN and Toader MOROZAN	Linear quadratic optimization problems for some discrete-time stochastic linear systems
Amir MAHMOOD and Saima PARVEEN	Hamilton-Jacobi equations with jumps: asymptotic stability
Mircea NICA	Asymptotic behavior random Hamilton-Jacobi equations (R.H. –J.E.)
Valeriu PREPELIȚĂ	Linear 2D hybrid systems over spaces of regulated functions
Vladimir RĂSVAN, Daniela DANCIU and Dan POPESCU	Nonlinear and time delay systems for flight control
Adrian-Mihail STOICA and Isaac YAESH	Adaptive control for a class of stochastic passive Hopfield networks
