SOMMAIRE

Special Issue Dedicated to Professor Nicu Boboc on the Occasion of His 80th Birthday

Guest Editors: Dominique BAKRY, Lucian BEZNEA, and Michael RÖCKNER	Foreword
Jiří VESELÝ	Life and work of Nicu Boboc
Viorel BARBU	Asymptotic behaviour of the two phase stochastic Stefan flows driven by multiplicative Gaussian processes
Youness BOUTAIB, Lajos Gergely GYURKÓ, Terry LYONS, and Danyu YANG	Dimension-free Euler estimates of rough differential equations
Kristian P. EVANS, Niels JACOB, and Owen C. MORRIS	On a class of pseudo-differential operators on $\mathbb{R}^n \times \mathbb{Z}^m$ generating Feller semigroups
Denis FEYEL and Arnaud de la PRADELLE	Capacities associated with kernels. The Gaussian case
Patrick J. FITZSIMMONS	Gross' Brownian motion fails to satisfy the polarity principle
Wolfhard HANSEN and Ivan NETUKA	Representation of potentials
Mohamed HMISSI and Klaus JANSSEN	On \mathcal{S} -subordination and applications to entrance laws
Eiki KOKUBO and Kazuhiro KUWAE	On spectral bounds for symmetric Markov chains with coarse Ricci curvatures
Jiyong SHIN and Gerald TRUTNAU	Pointwise weak existence of distorted skew Brownian motion with respect to discontinuous Muckenhoupt weights
