

REVUE ROUMAINE DE MATHÉMATIQUE PURES ET APPLIQUÉES
(ROMANIAN JOURNAL OF PURE AND APPLIED MATHEMATICS)

TOME LII. N°. 1, 2007

SOMMAIRE

- Aurelian CERNEA A viability result for a class of nonconvex
differential inclusions
- N.M.M. COUSIN-RITTEMARD Continuation methods and disjoint equilibria
and Isabelle GRUAIS
- Karma DAJANI and On the convergence of logarithmic first return times
Charlene KALLE
- Ian GRAHAM, Gabriela Parametric representation and linear functionals
KOHR and John A. associated with extension operators for biholomorphic
PFALTZGRAPFF mappings
- Cristian NICULESCU Multiobjective fractional programming involving
 ρ -semilocally preinvex and related functions
- Liliana PAVEL Weak containment and hypergroup algebras
- Annick VALIBOUZE Classes doubles, idéaux de Galois et résolvantes
- Marian VÂJĂITU and Metric properties of the degree function over a
Alexandru ZAHARESCU p -adic field
