

REVUE ROUMAINE DE MATHÉMATIQUE PURES ET APPLIQUÉES

(ROMANIAN JOURNAL OF PURE AND APPLIED MATHEMATICS)

TOME LII. N^o. 2, 2007

SOMMAIRE

- Fadila BENTALHA, Isabelle GRUAIS and Dan POLIŠEVSKI Diffusion process in a rarefied binary structure
- S. CAENEPEEL and E. DE GROOT Galois theory for weak Hopf algebras
- Bogdan ICHIM and Udo VETTER Length formulas for the homology of generalized Koszul complexes
- Petre Sorin ILIAȘ Existence and multiplicity of solutions for a system of quasilinear equations
- Wolfgang KNIRSCH and Georg SCHNEIDER Compactness of generalized Hankel operators with unbounded and anti-holomorphic symbols on generalized Fock spaces
- Cristina MANOLACHE Rational Gromow-Witten invariants of higher codimensional subvarieties
- Janina Mihaela MIHAILĂ, Octav OLTEANU and Constantin UDRIȘTE Markov-type and operator-valued multidimensional moment problems, with some applications
