

ACADEMIE ROUMAINE
REVUE ROUMAINE DE MATHÉMATIQUE PURES ET APPLIQUÉES
(ROMANIAN JOURNAL OF PURE AND APPLIED MATHEMATICS)
TOME LII • N° 5, 2007
SOMMAIRE

Costel BALCĂU	Convex quadratic programming with partial entropic perturbation
Richard BECKER	Convex cones, tensor products and operators
Aurelian CERNEA	An approach to second-order necessary conditions for multiparameter discrete inclusions
Mihai CRISTEA	Mappings of finite distortion: Zoric's theorem and equicontinuity results
Romulus CRISTESCU	Bands of regular operators
Ulrich HERKENRATH and Marius IOSIFESCU	On a contractibility condition for iterated random functions
I.M.STANCU-MINASIAN and Andreea Mădălina STANCU	Duality for nonlinear fractional programming involving generalized ρ -semilocally b -preinvex functions
COMPTE RENDUS
