SOMMAIRE

Cabiria ADREIAN CAZACU	Foreward
A. ALONSO GOMEZ and A. FERNANDEZ ARIAS	On the periods of harmonic and meromorphic forms on Klein surfaces
Anca ANDREI	Quasiconformal mappings in Ahlfors regular spaces
Cristina BALLANTINE and Dorin GHIȘA	Color visualization of Blaschke selfmappings of the real projective plane
Ilie BÂRZA and Dorin GHIȘA	Excerpts of analysis on Klein surfaces
Habib BENFRIKA, Ileana BUCUR, Antonio NUICĂ and Speranța VLĂDOIU	A note on the excessive functions of a resistance form
Ileana BUCUR	Daniell and Riemann integrability
Oleksiy DOVGOSHEY and Olli MARTIO	Products of metric spaces, covering numbers, packing numbers and characterizations of ultrametric spaces
Timo ERKAMA	Arithmetic progressions in cycles of quadratic polynomials
Maarit JÄRVENPÄÄ	Visibility and fractal percolation
Maria KARMANOVA	On geometric measure theory on rectifiable metric spaces
Luminița LEMNETE-NINULESCU	Operator-valued trigometric moment and $L$ -moment problems
Pertti MATTILA	Removability, singular integrals and rectifiability
Irina MEGHEA	On some perturbed variational principles: connexions and applications
Eugen MIHĂILESCU	Dynamics on higher dimensional real or complex fractals

Irina MITREA, Marius MITREA and Mei-Chi SHAW	On the interplay between several complex variables, geometric measure theory, and harmonic analyses
Monica ROȘIU	Local trajectories on Klein surfaces
Vladimir RYAZANOV, Uri SREBRO and Eduard YAKUBOV	Moduli in modern mapping theory
Emil SĂUCAN	Intrinsic differential geometry and the existence of quasimeromorphic mappings
Victoria STANCIU	Normal and compact families of finite length distortion Homeomorphisms
Corneliu UDREA	Compactness and uniform convergences of solutions of the Monge-Ampère equation
