SOMMAIRE

Aurelian CERNEA	Derived cones to reachable sets of a class of second-order differential inclusions	1
N.M.M. COUSIN-RITTEMARD	On the models of the homothetic self-similar Kármán flows . .	13
Eugen J. IONAȘCU and Andrew WILSON	On the Erdős-Straus conjecture	21
Cristian NICULESCU and Costel BĂLCĂU	On the convergence of a hyperboloid approximation procedure for a perturbed generalized Euclidean multifacility location problem .	31
C. SELVARAJ and K.A. SELVAKUMARAN	Some subclasses of multivalent analytic functions involving a generalized differential operator	43
Marius M. SOMODI	Small wild sets of self-equivalences of number fields	57
Ciprian A. TUDOR	On the structure of Gaussian random variables	69
Luis MAGNIN	Errata to the paper “Left invariant complex structures on $U(2)$ and $SU(2) \times SU(2)$ revisited” (55(2010), 4, 269-296)	83
