

INDEX ALPHABÉTIQUE – ALPHABETICAL INDEX

Lori BADEA, Two-level methods for variational inequalities of the second kind and quasi-variational inequalities.....	4	315
Rachid BENABIDALLAH (see Fazia LASFER)		
Dumitru BOTNARU, Groupoïd des souscatégories \mathcal{L} -semi-reflexives	1	61
Claude-Michel BRAUNER and Luca LORENZI, Local existence in free interface problems with underlying second-order Stefan condition	4	339
Vasile BRÎNZĂNESCU and George DINCĂ, Foreword.....	4	313
C. BREZINSKI and M. REDIVO-ZAGLIA, Hirota’s bilinear method, Shanks’ transformation, and the ε -algorithms.....	4	361
Tomasz BRZEZIŃSKI, Towards semi-trusses	2	75
Ovidiu CALIN, Entropy maximizing curves.....	2	91
Yuan-Jen CHIANG, Remarks of exponentially harmonic maps.....	3	237
Lucie DELCEY and Mariana HARAGUS, Instabilities of periodic waves for the Lugiato-Lefever equation	4	377
George DINCĂ (see Vasile BRÎNZĂNESCU)		
François EBOBISSE (see Fazia LASFER)		
Ji GAO, The introduction of new modulus $\zeta(\varepsilon)$, uniform non-squaredness and uniform normal structure in Banach spaces	1	49
V. GIRAULT and L. Ridgway SCOTT, On Oldroyd models without explicit dissipation	4	401
Mariana HARAGUS (see Lucie DELCEY)		
Radu IORDĂNESCU, Foreword.....	2	73
Richard KERNER, Ternary generalizations of graded algebras with some physical applications	2	107
Fazia LASFER, Rachid BENABIDALLAH and François EBOBISSE, On global and decay solution for large size data of nonlinear Kirchhoff model in slowly increasing moving domains.....	1	1
Mario LEFEBVRE, LQG homing problems for processes used in financial mathematics.....	1	27
Luca LORENZI (see Claude-Michel BRAUNER)		
Enrique MACÍAS-VIRGÓS, The Cayley transform on Lie groups, symmetric spaces and Stiefel manifolds	2	143

Antonio Roberto MARTÍNEZ FERNÁNDEZ, An alternative proof of the differentiability of the volume with respect to the L -sum of convex bodies.....	1	39
Anis MESSAOUD and Aymen RAHALI, On the continuity of the Lipsman mapping of semidirect products.....	3	249
Petru MIRONESCU, The role of the Hardy type inequalities in the theory of function spaces	4	447
Gelu PAȘA, Wetting-layer effects on Hele-Shaw flow.....	2	161
Udrea PĂUN, G method in action: fast exact sampling from set of permutations of order n according to Mallows model through Kendall metric.....	3	259
Aymen RAHALI (see Anis MESSAOUD)		
M. REDIVO-ZAGLIA (see C. BREZINSKI)		
Elisabeth REMM, On filiform Lie algebras. Geometric and algebraic studies.....	2	179
Mauro RICCI, Some considerations about commutative multiplicative unitaries..	3	287
L. Ridgway SCOTT (see V. GIRAULT)		
Denis SERRE, Periodic homogenization in terms of differential forms.....	4	527
Mircea SOFONEA, A class of optimization problems with applications in Contact Mechanics	4	547
L.L. STACHÓ, On C_0 -semigroups of holomorphic isometries with fixed point in JB^* -triples.....	2	211
Radu ZAHAROPOL, On the convergence of sequences of probability measures..	3	289
