

Lucrari stiintifice

Asupra unei proprietati de principiu de minim in plan, Studii si Cercetari Matematice, tome 42, no.3 (1990), 241-245.

Inductive and projective limits of H-cones. Applications to the theory of excessive measures, Rev. Roum. Maths. Pures et appl., tome 39, no.5 (1994), 457-478 (joint paper with Gh.Bucur and N.Zeddini)

The extension of Grishin's lemma to excessive measures, Potential Analysis 7(1997), 681-687.

On some results concerning the reduite and balayage, Math. Nachr. 223 (2001), 65-75.

Extension of transient resolvents, Potential Analysis 17(2002), 25-29.

An analytic approach to the extended Dirichlet Space, Osaka J, Math. 39 (2002), 605-611.

Duality and quasi-continuity for supermartingales, Seminaire de Probabilites 36 (2002), 402-412, Lecture Notes in Math., Springer.

Positive increasing bilinear forms associated with stochastic processes, Seminaire de Probabilites 38 (2004), 145-157, Lecture Notes in Math., Springer.

On potentials generated by increasing processes, Math.reports Vol 9 (59), No. (2007), 267-274.

On generating H_p spaces of martingales, Rev.roumaine de math.pureset appl. tome LIII, No.4 (2008), 317-322.

Jumps of the canonical Markov process associated with a Ray semi-group, preprintseris of the Institute of Math. of the Roumanian Academy, No. 9/2008.

A family of L^2 -spaces associated to the jumps of a Markov process, preprint series of the Institute of Math. of the Roumanian Academy, No. 11/2009.

Natural local times, preprint series of the Institute of Math. Of the Roumanian Academy, No. 4/2010.
